In the afternoon, we visited Aziziye mosque

To follow we had a city tour organized in the form of a treasure hunt to make it funnier for students.

In the evening we took part to the suggestive Ceremony of whirling dervishes

Conclusion

It was a wonderful opportunity, challenging but rewarding, both for teachers and students. A path of education for innovation in which all participants communicated in English and showed great interest for the activities proposed by the Turkish Team.

Thanks to the perfect organization of our Turkish partners, we all got involved, got to know new realities and opened up to another culture, shared our knowledge and came back with new stimuli and new emotions experienced that enriched us professionally and personally.
