Erasmus+ Virtuously_Virtual

Tell me and I'll forget it.
Teach me and I'll remember it.
# Involve me and I'll learn it.
(B. Franklin)

The best apps in education

Teaching with apps

- the use of apps in schools both in presence and at a distance is increasingly important

- as teachers when we use apps we must be sure that they are age-appropriate and accessible to our students and that the data created is saved on protected servers
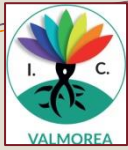

# G Suite for Education

G Suite for Education

- G-Suite offers various Google applications:
- Some are widely used (Gmail, Drive, Docs, Sheets, Presentations)
- Others are job-specific and we use them for the management of school activities, such as Groups, Meet and Classroom.
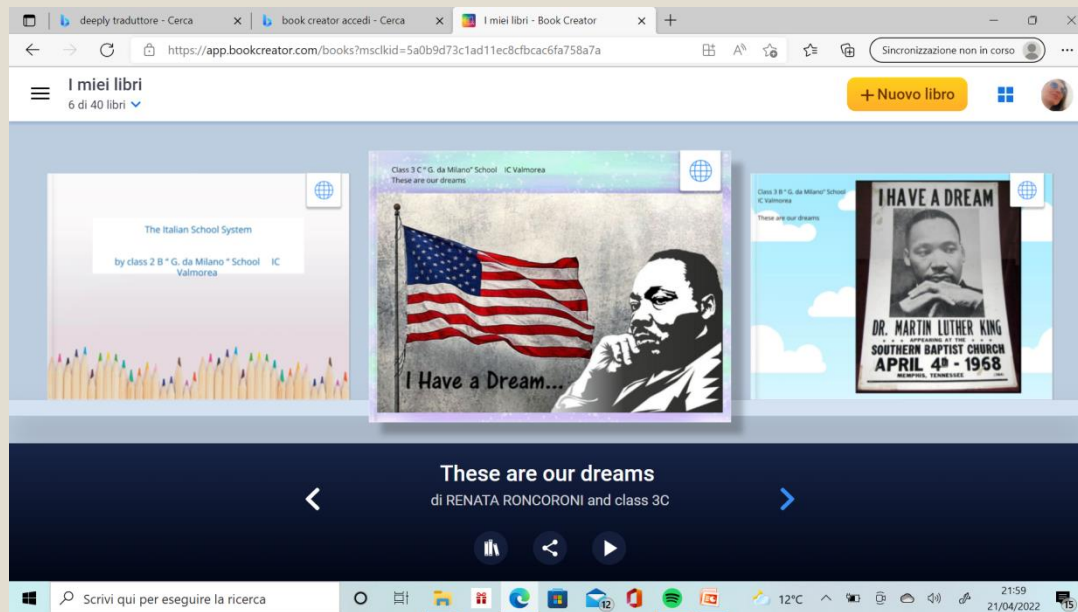

Screencast-o-matic

- allows you to make video by capturing audio and what is shown to desktop

- allows you to make video lessons that can be reviewed by students several times

- Free version for videos up to 15 minutes long
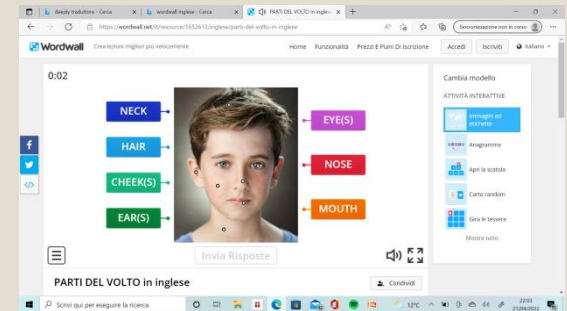

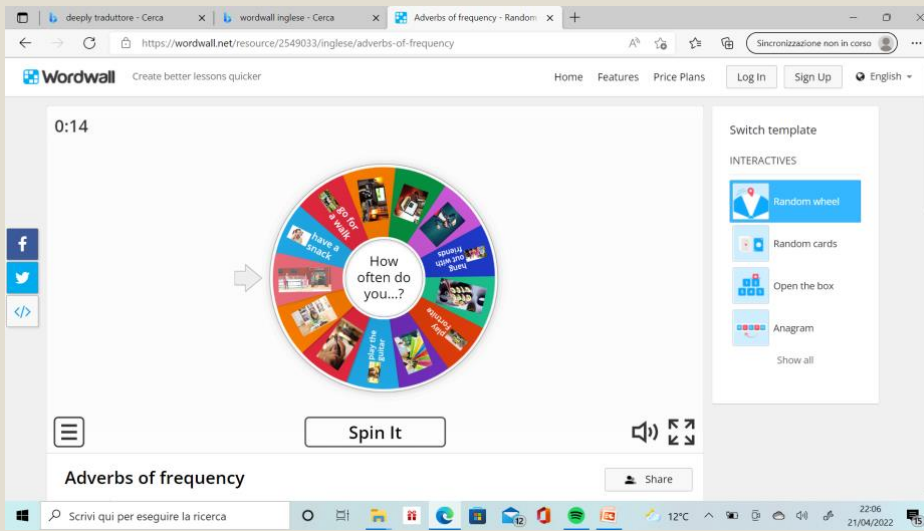

Bookcreator

- allows you to create digital books
- stories, comics, personal or shared papers and keep them in a virtual library

Wordwall

- allows you to create quizzes, match ups, word games and much more

Padlet

• an interactive whiteboard to collaborate with students who can paste virtual post-it notes on the same theme

Thank you for your attention
